

Please protect my rights as a citizen to choose broadcast programming which I want for my family. My family loves xm radio and the content of c-span , xmkids, and other news and current events programming. I would enjoy having local weather and traffic in my area. I believe it is a matter of choice. My husband and I choose to pay for this service just as we choose to have satellite T.V. versus just the local channels. This is the equivalent of telling the Weather channel that it can not broadcast local or regional weather reports.

Sincerely

Jinnifer Caldwell
